Empire; the Life, Legend, and Madness of Howard Hughes by Donald L Bartlett Donald L. Barlett, 1979

Howard Hughes James B. Steele, Donald L. Bartlett, 2012-11 Whether he was courting public attention in the roles of aviator, playboy and entrepreneur, or shunning it as a recluse, Howard Hughes commanded headlines throughout his career. Yet the image of his life, his power and his business empire that caught the public imagination was almost completely false. Hughes's fortune actually came from his father's tool company and, later, from the Hughes Aircraft Company, yet these flourished simply because Hughes was prevented from interfering in their workings. In fact, Hughes was a disastrous businessman - no company under his control ever built a successful aircraft, he nearly destroyed TWA and completely destroyed a major film studio, and even his gambling empire in Las Vegas was crippled by corruption. His personal life was even more disastrous - he feared, rightly, that he was mad and spent most of his fortune and the last 18 years of his life trying to prevent anyone finding out. He spent his time naked, eating little, addicted to drugs and tranquillisers, a physical wreck, and died surrounded by men who nurtured his madness for their own ends.

Neither Confirm nor Deny M. Todd Bennett, 2023-01-03 In 1974, the Hughes Glomar Explorer, ostensibly an advanced

deep-sea mining vessel owned by reclusive billionaire Howard Hughes, lowered a claw-like contraption to the floor of the Pacific Ocean. This high-tech venture was only a cover story for an even more improbable scheme: a CIA mission to retrieve a sunken Soviet submarine. Like a Jules Verne novel with an Ian Fleming twist, the saga of the Glomar Explorer features underwater espionage, impossible gadgetry, and high-stakes international drama. It also marks a key moment in the history of transparency—and not just for what became known as the Glomar response: “We can neither confirm nor deny. . . .” M. Todd Bennett plumbs the depths of government secrecy in this new account of the Glomar mission and its consequences. Trawling through recently declassified documents, he explores the logistics, media fallout, and geopolitical significance of one of the most ambitious operations in intelligence history. Glomar, Bennett argues, played a pivotal but underappreciated role in helping the CIA ward off oversight amid a push for transparency and accountability. He reframes the operation’s history to offer an alternative perspective on the 1970s, a decade known for expansive openness, as well as the persistent tension between the demands of democracy and the need for secrecy in foreign policy. Combining keen historical analysis and gripping storytelling, *Neither Confirm nor Deny* brings to the surface fresh insights into the history of the security state, the politics of intelligence, and the CIA’s relationship with the media and the public.

Boxes: The Secret Life of Howard Hughes Douglas Wellman, Mark Musick, 2016-03-22 ...well documented and researched...*Boxes* is definitely a fascinating read and a must read for anyone who is at all curious about Howard Hughes’ life. This second edition of *Boxes: The Secret Life of Howard Hughes* continues the history-changing story of Eva McLelland and her reclusive life married to a mystery man she discovered was Howard Hughes. Eva McLelland kept her secret for thirty-one stressful years as she lived a nomadic existence with a man who refused to unpack his belongings for fear he would be discovered and have to flee. Only her husband’s death finally released her to tell the story that had been burning inside her for decades.

When Computers Were Human David Alan Grier, 2013-11-01 Before Palm Pilots and iPods, PCs and laptops, the term computer referred to the people who did scientific calculations by hand. These workers were neither calculating geniuses nor idiot savants but knowledgeable people who, in other circumstances, might have become scientists in their own right. *When Computers Were Human* represents the first in-depth account of this little-known, 200-year epoch in the history of science and technology. Beginning with the story of his own grandmother, who was trained as a human computer, David Alan Grier provides a poignant introduction to the wider world of women and men who did the hard computational labor of science. His grandmother's casual remark, I wish I'd used my calculus, hinted at a career deferred and an education forgotten, a secret life unappreciated; like many highly educated women of her generation, she studied to become a human computer because nothing else would offer her a place in the scientific world. The book begins with the return of Halley's comet in 1758 and the effort of three French astronomers to compute its orbit. It ends four cycles later, with a UNIVAC electronic computer

projecting the 1986 orbit. In between, Grier tells us about the surveyors of the French Revolution, describes the calculating machines of Charles Babbage, and guides the reader through the Great Depression to marvel at the giant computing room of the Works Progress Administration. *When Computers Were Human* is the sad but lyrical story of workers who gladly did the hard labor of research calculation in the hope that they might be part of the scientific community. In the end, they were rewarded by a new electronic machine that took the place and the name of those who were, once, the computers.

Expanded Cinema Gene Youngblood, 2020-03-03 Fiftieth anniversary reissue of the founding media studies book that helped establish media art as a cultural category. First published in 1970, Gene Youngblood's influential *Expanded Cinema* was the first serious treatment of video, computers, and holography as cinematic technologies. Long considered the bible for media artists, Youngblood's insider account of 1960s counterculture and the birth of cybernetics remains a mainstay reference in today's hypermediated digital world. This fiftieth anniversary edition includes a new Introduction by the author that offers conceptual tools for understanding the sociocultural and sociopolitical realities of our present world. A unique eyewitness account of burgeoning experimental film and the birth of video art in the late 1960s, this far-ranging study traces the evolution of cinematic language to the end of fiction, drama, and realism. Vast in scope, its prescient formulations include "the paleocybernetic age," "intermedia," the "artist as design scientist," the "artist as ecologist," "synaesthetics and kinesthetics," and "the technosphere: man/machine symbiosis." Outstanding works are analyzed in detail. Methods of production are meticulously described, including interviews with artists and technologists of the period, such as Nam June Paik, Jordan Belson, Andy Warhol, Stan Brakhage, Carolee Schneemann, Stan VanDerBeek, Les Levine, and Frank Gillette. An inspiring Introduction by the celebrated polymath and designer R. Buckminster Fuller—a perfectly cut gem of countercultural thinking in itself—places Youngblood's radical observations in comprehensive perspective. Providing an unparalleled historical documentation, *Expanded Cinema* clarifies a chapter of countercultural history that is still not fully represented in the arthistorical record half a century later. The book will also inspire the current generation of artists working in ever-newer expansions of the cinematic environment and will prove invaluable to all who are concerned with the technologies that are reshaping the nature of human communication.

EGO IS THE ENEMY Ryan Holiday, 2019-04-08 Buku yang Anda pegang saat ini ditulis dengan satu asumsi optimis: Ego Anda bukanlah kekuatan yang harus Anda puaskan pada setiap kesempatan. Ego dapat diatur. Ego dapat diarahkan. Dalam buku ini, kita akan melihat orang-orang, seperti William Tecumseh Sherman, Katharine Graham, Jackie Robinson, Eleanor Roosevelt, Bill Walsh, Benjamin Franklin, Belisarius, Angela Merkel, dan George C. Marshall. Bisakah mereka mendapatkan yang telah mereka dapatkan sekarang—menyelamatkan perusahaan yang hampir bangkrut, menguasai seni peperangan, menjaga kekompakan tim bisbol, merevolusi strategi rugby, melawan tirani, dan menghadapi ketidakberuntungan—jika ego

menguasai mereka dan membuat mereka hanya memikirkan diri sendiri? Hal yang membuat mereka sukses adalah pemahaman terhadap realitas dan kesadaran—sesuatu yang pernah dikatakan oleh seorang penulis dan ahli strategi Robert Greene, “kita perlu menyerupai laba-laba dalam sarangnya”. Itulah inti dari kehebatan mereka, kehebatan penulisan, kehebatan desain, kehebatan bisnis, kehebatan dalam pemasaran, dan kehebatan kepemimpinan mereka. Yang kami temukan saat mempelajari orang-orang tersebut adalah mereka selalu memiliki dasar berpikir, berhati-hati, dan realistis. Tidak ada satu pun dari mereka yang tidak memiliki ego sama sekali. Akan tetapi, mereka tahu cara meredamnya. Tahu cara menyalurkannya dan melepaskannya, ketika ego muncul. Mereka hebat namun tetap rendah hati. Sebentar, tunggu dulu, tetapi ada juga beberapa orang yang memiliki ego tinggi dan sukses. Bagaimana dengan Steve Jobs? Kanye West? Beberapa dari mereka mempelajari kerendahan hati. Beberapa orang memilih ego. Beberapa mempersiapkan diri untuk perubahan nasib, positif ataupun negatif. Yang lainnya tidak siap. Yang mana yang akan Anda pilih? Akan menjadi siapakah Anda? Yang pasti, Anda telah memilih buku ini karena merasa bahwa Anda membutuhkan menjawab pertanyaan itu, cepat atau lambat, sadar atau tidak sadar.

The Global Industrial Complex Steven Best, 2011 *The Global Industrial Complex: Systems of Domination* is a groundbreaking collection of essays by a diverse set of leading scholars who examine the entangled and evolving global array of corporate-state structures of hegemonic power--what the editors refer to as the power complex--that was first analyzed by C. Wright Mills in his 1956 classic work, *The Power Elite*. In this new volume edited by Steven Best, Richard Kahn, Anthony J. Nocella II, and Peter McLaren, the power complex is conceived as co-constituted, interdependent and imbricated systems of domination. Spreading insidiously on a global level, the transnational institutional relationships of the power complex combine the logics of capitalist exploitation and profits and industrialist norms of efficiency, control, and mass production, While some have begun to analyze these institutional complexes as separate entities, this book is unique in analyzing them as overlapping, mutually-enforcing systems that operate globally and which will undoubtedly frame the macro-narrative of the 21st century (and perhaps beyond). The global industrial complex--a grand power complex of complexes--thus poses one of the most formidable challenges to the sustainability of planetary democracy, freedom and peace today. But there can be no serious talk of opposition to it until it is more popularly named and understood. *The Global Industrial Complex* aims to be a foundational contribution to this emerging educational and political project.

Howard Hughes Peter Harry Brown, Pat H. Broeske, 2004-11-03 Howard Hughes was one of the most amazing, intriguing, and controversial figures of the twentieth century. He was the billionaire head of a giant corporation, a genius inventor, an ace pilot, a matinee-idol-handsome playboy, a major movie maker who bedded a long list of Hollywood glamour queens, a sexual sultan with a harem of teenage consorts, a political insider with intimate ties to Watergate, a Las Vegas kingpin, and ultimately a bizarre recluse whose final years and shocking death were cloaked in macabre mystery. Now he is the subject of

Martin Scorsese's biopic *The Aviator*. Few people have been able to penetrate the wall of secrecy that enshrouded this complex man. In this fascinating, revelation-packed biography, the full story of one of the most daring, enigmatic, and reclusive power brokers America has ever known is finally told.

Serious Educational Game Assessment: Practical Methods and Models for Educational Games, Simulations and Virtual Worlds L.A. Annetta, Stephen Bronack, 2011-07-22 In an increasingly scientific and technological world the need for a knowledgeable citizenry, individuals who understand the fundamentals of technological ideas and think critically about these issues, has never been greater. There is growing appreciation across the broader education community that educational three dimensional virtual learning environments are part of the daily lives of citizens, not only regularly occurring in schools and in after-school programs, but also in informal settings like museums, science centers, zoos and aquariums, at home with family, in the workplace, during leisure time when children and adults participate in community-based activities. This blurring of the boundaries of where, when, why, how and with whom people learn, along with better understandings of learning as a personally constructed, life-long process of making meaning and shaping identity, has initiated a growing awareness in the field that the questions and frameworks guiding assessing these environments should be reconsidered in light of these new realities. The audience for this book will be researchers working in the Serious Games arena along with distance education instructors and administrators and students on the cutting edge of assessment in computer generated environments.

Howard Hughes Howard Hughes, Clifford Irving, 2008 ...Howard Hughes never wrote his autobiography...what you are about to read is actually a hoax...Irving was already a best-selling author when, in late 1970, he hit upon the idea of faking the autobiography of Howard Hughes...--Foreword.

Laugh Lines Carrie Conners, 2022-04-19 Humor in recent American poetry has been largely dismissed or ignored by scholars, due in part to a staid reverence for the lyric. *Laugh Lines: Humor, Genre, and Political Critique in Late Twentieth-Century American Poetry* argues that humor is not a superficial feature of a small subset, but instead an integral feature in a great deal of American poetry written since the 1950s. Rather than viewing poetry as a lofty, serious genre, Carrie Conners asks readers to consider poetry alongside another art form that has burgeoned in America since the 1950s: stand-up comedy. Both art forms use wit and laughter to rethink the world and the words used to describe it. Humor's disruptive nature makes it especially whetted for critique. Many comedians and humorous poets prove to be astute cultural critics. To that end, *Laugh Lines* focuses on poetry that wields humor to espouse sociopolitical critique. To show the range of recent American poetry that uses humor to articulate sociopolitical critique, Conners highlights the work of poets working in four distinct poetic genres: traditional, received forms, such as the sonnet; the epic; procedural poetry; and prose poetry. Marilyn Hacker, Harryette Mullen, Ed Dorn, and Russell Edson provide the main focus of the chapters, but each chapter compares those poets to others writing humorous political verse in the same genre, including Terrance Hayes and Anne Carson. This comparison highlights the pervasiveness of this trend in recent American poetry and reveals the particular ways the poets use conventions of genre to generate and even amplify their humor. Conners argues that the interplay between humor and genre creates special opportunities for political critique, as poetic forms and styles can invoke the very social constructs that the poets deride.
