Fleet Driver Safety Todd Soard,Scott Maker,2012-01-17 Most companies that employ a fleet of commercial vehicles look for more than commercial driver's licenses (CDL) from their drivers. Fleet safety directors want to know that their drivers have the skills to operate safely on the roads, protect themselves from injury and accidents, and best represent the company for which they drive. Fleet Driver Safety is a course developed to provide drivers with these skills and help them meet job requirements for safe driver training. The Fleet Driver Safety course covers defensive driving strategies and incidence avoidance; basic traffic laws and procedures; safe driving practices in different environments and the challenges of driving in severe weather and other extreme conditions' and the use of protective equipment to minimize injuries and accidents.

Proposed Definitions of Safe Driving Pierro Hirsch,Université de Montréal. Centre de recherche sur les transports,1995 A survey of traffic accident literature reveals a marked lack of agreement on what constitutes a valid measure of driving safety, as well as an apparent lack of strong support for a single coherent theoretical model to explain or

account for the occurrence of driving collisions. This discussion paper suggests that there is a tendency to confuse the interrelated but distinctly different concepts of legal and safe driving. The paper reviews the driver education process and the characteristics of the driver's license examination in relation to acquisition and retention of safe driving skills. The paper then proposes a definition of safe driving, contrasts this with legal driving, and suggests a cognitive approach to collision prevention training and driver licensing based on the teaching of safety protocols.
