Heat Pumps Randy F. Petit (Sr.), Turner L. Collins, 2011-09-30 This 78-page book provides a comprehensive overview of the heat pump system, its operations and principles. The heat pumps covered in this book are basic systems. The intent of the book is to offer technicians information to build upon to enhance their knowledge of the air conditioning and heating field, specifically, heat pumps. Before installing or servicing a heat pump system, the technician must have proper training and knowledge of air conditioning/refrigeration theory, principles and operation. New highly efficient equipment heat pump systems using HFC refrigerant (R-410A) are being sold and installed. These systems pose new demands for installers and service technicians. A heat pump's efficiency can be greatly diminished, regardless of the type of refrigerant, if it is not properly installed, serviced and maintained.

ESCOs Around the World Shirley J. Hansen, Pierre Langlois, Paolo Bertoldi, 2020-12-17 This book provides an insightful assessment of today's ESCO (energy services) industry around the world. Analyzing current trends, the volume discusses opportunities and problems of the ESCO industry in each country. It includes significant contributions by Pierre Langlois and Paolo Bertoldi. The author and contributors have reached into the far corners of the world to get trusted colleagues to tell the story of the energy services industry's development in their respective countries, and in their own words. Chapters cover

selected countries from Western Europe, Eastern Europe, Africa, the Middle East, Asia, North America, South America, New Zealand and Australia, as well as the overall global picture.

World ESCO Outlook Pierre Langlois, Shirley J. Hansen, 2020-12-17 As country after country around the world embraces the idea of self-funding energy efficiency, an energy performance contracting (EPC) model emerges and then changes to meet local needs. World ESCO Outlook captures this rapidly changing landscape, and offers valuable insights into this fascinating and important industry. The authors have brought together the best of in-country experts from nearly 60 countries to share their knowledge and experience as to what makes EPC successful in their specific environments. In telling their story, they also reveal some exciting new overseas market opportunities, and provide the most complete picture available of today's ESCO world. EPC offers the tools and answers to get energy saving projects going. Energy efficiency is the most cost effective way to reduce pollution and, at the same time, make money. EPC brings these goals together by making future energy savings available now to meet energy and environmental needs with guaranteed results.

Financing Energy Efficiency Robert P. Taylor, Chandrasekar Govindarajalu, Jeremy Levin, Anke S. Meyer, William A. Ward, 2008-02-08 While energy efficiency projects could partly meet new energy demand more cheaply than new supplies, weak economic institutions in developing and transitional economies impede developing and financing energy efficiency retrofits. This book analyzes these difficulties, suggests a 3-part model for projectizing and financing energy efficiency retrofits, and presents thirteen case studies to illustrate the issues and principles involved.
